Performance Metrics Scorecard Now Live

By Nate Gargiulo

The Office of Public School Construction (OPSC) is proud to announce that the Performance Metrics Scorecard is now live! The Performance Metrics Scorecard can be found on the OPSC website under the tab "Quick Links." The Performance Metrics Scorecard now allows customers to track their School Facility Program projects from original submittal to the OPSC to the day they are presented to the State Allocation Board (Board), providing an important resource and greater transparency into the OPSC's processing timelines.

Important Milestones

The Performance Metrics Scorecard shows the average number of days it takes to process an Adjusted Grant funding application to the Board. In addition, customers are able to track important milestones associated with their individual projects, such as:

- Application for Funding Received Date
- Date the OPSC's Application Review Team (ART) issued a 24-hour notice to the school district (if application was incomplete)
- Date the school district's 24-hour response was received by the ART
- Date when the 15-day letter was sent to the school district by the project manager, if applicable
- Date the 15-day response was received by the project manger
- Date the 4-day letter was sent to the school district, if applicable
- Date the 4-day response was received by the project manager
- Date that the application processing was complete
- Board approval date
