Dear: Mr. Walls.

I object to the removal of PVC and ABS pipes for the reason that is not good for the enviroment. I suggest that they should keep it the way it is it much better and more powerful Incase a fire starts is quicker to burn and it will also blow out black smoke that is deadly and toxic to all of us, especially if theres kids around. For example near schools hospitals and etc.. I strongly recomend we should keep cast iron pipes after 3 floors of a building.

Sincerily: Daniel. Castañeda. 10/9/09.
