Architectural Plans

The chart indicates the number of projects that utilized existing architectural plans from another project (out of the 637 new construction projects apportioned from 2008 through May 1, 2012 that were required to submit a Project Information Worksheet (PIW) at the time the data was compiled*). For projects with re-used plans, the average number of times the same plans were re-used is also indicated.

Projects Modified After State Apportionment

The chart shows the number out of the 637 new construction projects apportioned from 2008 to May 1, 2012 that were required to submit a PIW*, where the district has indicated the project scope was modified as a result of cost considerations. The modification descriptions were summarized into categories as listed above.

* PIW submittal is required three times in the course of a new construction project: 1) at the time of the full grant fund release; 2) with the first annual expenditure report following the full grant fund release; 3) with the final expenditure report when the project is complete. The data in these graphics does not include any apportioned project for which a fund release was not submitted when the data was compiled.

Permanent Construction by Career Technical Education (CTE) Services Region

The chart indicates the permanent square feet construction for the 637 new construction projects apportioned from 2008 through May 1, 2012 that were required to submit a Project Information Worksheet (PIW) at the time this data was compiled.*

* PIW submittal is required three times in the course of a new construction project: 1) at the time of the full grant fund release; 2) with the first annual expenditure report following the full grant fund release; 3) with the final expenditure report when the project is complete. The data in this graphic does not include any apportioned project for which a fund release was not submitted when the data was compiled.
