CBSC
ATTN: Dave Walls, Exec. Director

Dear Mr. Walls,

I am a registered voter with many community contacts and I am asking for your help in not removing the restriction of the use of PVC + ABS pipes & fittings in the healthcare industry.

In a green economy, we should be using products that are recyclable. Plastic is not made from nor turned into recycled material. Cast iron is the safest choice as well since plastic when burned creates a toxic fume.

Public safety + pushing green should be the overriding concern of the CBSC. Please do not remove the restriction

Best Regards,
Michele Selby
