Subject: greywater

Dear Dave Walls,

My name is Ashley McNamara and I live in Oakland, CA. I am very pleased with the new greywater code for the state of California, and think the no-permit requirement for washing machine and single fixture systems is a very important aspect of the code. This will make simple greywater systems economical for Californians seeking to conserve water. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

Sincerely,
Ashley McNamara

"Human salvation lies in the hands of the creatively maladjusted."
