Subject: California Plumbing Code, Part 5, Title 24

Dear Dave Walls,

My name is, Aaron White, and I live in Bermuda Dunes, CA. I am very pleased with the new greywater code for the state of California, and think the no-permit requirement for washing machine and single fixture systems is a very important aspect of the code. This will make simple greywater systems economical for Californians seeking to conserve water. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

With the drought that much of California has been in for some period of time, I'm sure that you also realize the importance of reducing our water consumption or at the very least as this bill provides for, reusing the water as a form of water conservation.

Sincerely,
Aaron White
