Subject: re the new grey water standards

Dear Mr. Walls,

As the founder and Executive Co-Producer of the largest sustainability event in the country (Green Festivals), I am very excited to hear that you are changing California's antiquated greywater code. I think the no-permit requirement for washing machine and single fixture systems is a great piece of the code. It will make greywater systems easier for Californians wanting to address our drought conditions by saving water. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse. Please continue to remove barriers to simple sustainable practices.

peace,

Dr. Kevin Danaher

Cofounder, Global Exchange and GreenFestivals.org
