Dear Mr Walls,

I heard that the BSC is looking into the removal of the height restriction for plastic pipe.

I have Multiple Sclerosis and have limited mobility. Hospitals are full of people like me or they would not be there. Plastics emit toxic fumes in fires and patients in a hospital would be trapped.

When the MGM Grand Hotel in Las Vegas caught fire n the late 1990's, most of the deaths were not near the flames, but were overtaken by toxic fumes from palstics burning.

Plastic pipe is not recyclable and would end up in landfills, further endangering human lives if this ground became radioactive.

I ask you to review this amendment carefully before rendering a decision.

Regards,  
Jim Anderlik
