Subject: California gray water code

Dear Director Walls,

I am writing to express my support for the new greywater code for the State of California. The no-permit requirement for washing machine and single fixture systems is very important to help encourage reuse of greywater by making simple greywater systems more economical for Californians. The twelve requirements for no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

Thank you,

Jared Crawford
