Subject: comment on CA greywater code

Dear Dave Walls,

I am writing to tell you how pleased I am with the new greywater code.

I live in the Bay Area, and this new code, especially the ability to construct unpermitted single fixture systems, will be a great help to water conservation efforts in the Bay Area and across the entire state.

Simple greywater systems can be easily made to be safe, and the requirements in the proposed code will ensure that health is protected.

I ask that you leave that section of code intact, and work in the future to make simple, effective practices like greywater systems legal and accessible.

Sincerely,  
Peter Ralph  
Oakland, CA
