Dear Mr. Walls,

I am a green builder based in Mountain View, we build homes throughout the communities of the silicon valley. I would like to express my and our community's support for the new regulations, in particular the unpermitted single source system portion of the code. We have installed several systems already in the last few weeks which have been covered by all of the local news media and received very positively by local residents as well as building officials.

I encourage the HCD to keep these new codes intact and move forward with public outreach to encourage the installation of these systems.

Regards,

Randy Potter
