Subject: Greywater!

Dear Mr Walls,

My name is Tamir Scheinok and I live in Oakland, California. I am very pleased with the new

greywater code for the state of California, and think the no□permit requirement for washing

machine and single fixture systems is a very important aspect of the code. This will make simple

greywater systems economical for Californians seeking to conserve water. The 12 requirements

for the no□permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of

permits and fees for simple sustainable practices.

Sincerely, Tamir Scheinok
