Dear Dave Walls,

I am a garden designer who lives and works in Petaluma. I am certified in Bay Friendly Practices and Sustainable Landscape Practices (Sonoma State) and am a huge supporter of the new greywater code for the state of California. It is so greatly needed, especially during these times of drought. I think the no-permit requirement for washing machine and single fixture systems is a vital aspect of the code. These simple greywater systems will be an economical way to conserve and recycle water. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse. Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

Sincerely,

Virginia O'Connell
