Subject: CA Greywater Code

Dear Mr. Walls,

My name is, Wayde Lawler and I have lived in Berkeley for the past two years. As a native of another drought plagued state (ND), I can appreciate the many pressures on California's water supply. I am very pleased with the new California greywater code, which honors our state's tradition of progressive conservation practices. The no-permit requirement for washing machine and single fixture systems is a very important aspect of the code. This will make simple greywater systems economical for Californians seeking to conserve water. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

Sincerely,

Wayde Lawler
