Subject: RE: Residential and Commercial Voluntary Tier 1 and Tier 2 Comments

In order to avoid confusion at the local jurisdictions, it needs to be explicitly stated that each individual measure within a category can be counted to achieve the Tier 1 and Tier 2 totals (not to be confused with double counting). I will assume this is acceptable by HCD and BSC, however this clarification should be included in the text of the 2010 code.

Thank you, Judi

Neither the BSC nor HCD GB Tiers specifically prohibit the double counting of measures. HCD has already acknowledged that compliance with the Tier 2 Energy portion which requires 8 Electives will prompt the need for double counting (which HCD has said is acceptable). While I have yet to hear the same from Dave at BSC, I have to assume that double counting will be just fine.

Hi Bob

Please let me know about the ability to count more than one per section and I will be happy to respond to your question for both the residential and commercial voluntary tier requirements. Hopefully my comments thus far are helpful?

I am leaving for ULI's Fall Mtg in SF tomorrow and I was hoping to get everything to you before I depart.

Thanks again, Judi
