Subject: comment on greywater code

Dear. Mr. Walls,

My name is Eugene Cordero and I'm a climate scientist working at San Jose State University. I work with various individuals and groups working on issues related to studying climate change and providing solutions. Some of this work involves water, and I wanted to express my support for the new greywater code for California. It's important to encourage conservations, especially in regards to water. I think this code is a good step forward, especially the no-permit requirement for washing machines. Let's encourage water conservation and reduce barriers that encourage sustainable behaviors.

Best regards,

Eugene
