Subject: greywater code

Dear Dave Walls,

As a landscape designer based in San Francisco, I am very pleased with the new greywater code for the state of California, and think the no-permit requirement for washing machine and single fixture systems is a very important aspect of the code. This will make simple greywater systems economical for Californians seeking to conserve water and I plan to incorporate these into my designs. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction to remove barriers such as permits and fees for simple sustainable practices.

Sincerely,
Katey Mulligan, APLD
