Dear Dave Walls,

My name is Margery Muench and I live in Palo Alto CA. I am very pleased with the new greywater code for the state of California, and think the no-permit requirement for washing machine and single fixture systems is a very important aspect of the code. This will make simple greywater systems economical for Californians like me who are seeking to conserve water. It is unaffordable for me at this time and prohibitively difficult as a renter to conserve greywater in a manner consistent with previous onerous greywater codes, and I am frustrated watching in vane as many many gallons of reuseable greywater I would like to be able to capture go wasted down my drains everyday even during periods of drought. The 12 requirements for the no-permit systems in the new code will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

Sincerely,
Margery
