

I am writing to you in support of the July 30th, 2009 modifications to the California Building Standards, for the installation of graywater systems for residential use. I support these changes for the following reason(s):

- 1) Water is precious & should be saved
- 2) Code is simple & inexpensive
- 3) Gray-water is good for plants
- 4) Promotes green zones & green thinking

Name

Peggy Lewis
