

BUDGET LETTER DRAFT

SUBJECT: GS \$MART AND OTHER MUNICIPAL LEASE FINANCING	NUMBER: 06-xx
REFERENCES: DGS MANAGEMENT MEMO XX	DATE ISSUED: June xx, 2006
	SUPERSEDES: NONE

TO: Departmental Budget Officers
Department of Finance Budget Staff

FROM: DEPARTMENT OF FINANCE

The purpose of this Budget Letter is to update departments on the availability of, and conditions for using, the Department of General Services' (DGS) Golden State Financial (\$) Marketplace program (GS \$Mart – pronounced "G S Smart").

GS \$Mart is a centralized listing of providers of financing services for the use of state and local governmental entities wishing to acquire tangible assets through the use of municipal lease arrangements. The providers on the list have been pre-approved by the DGS to reduce the time spent by acquiring entities in locating sound financing services. In addition, GS \$Mart also standardizes the process for soliciting bids and arranging contracts to further reduce the time and expense needed to secure prudent financing assistance.

The GS \$Mart program enables state departments to finance essential items of equipment and other goods. The program is designed to meet the standard requirements of municipal lease financing, which ensure that the loans are not considered state debt and satisfy tax-exemption, securities disclosure, and contract validity concerns. While the GS \$Mart program has been available for several years, it has recently undergone some statutory and procedural modifications to further enhance the efficiency and fiscal oversight of the program. The following discusses the **budgetary** process to be followed if a department desires to use GS \$Mart. For details about the GS \$Mart program, please refer to Management Memo xx and the GS \$Mart website: <http://www.pd.dgs.ca.gov/gsmart/default.htm>.

Baseline Budget:

Approval of GS \$Mart Financing Agreements. Departments may use their existing baseline operating expense budget allotments to make payments on GS \$Mart financing arrangements. Departments do not need to secure Department of Finance (DOF) approval prior to committing to a GS \$Mart contract, however, approval by the DGS is required (see Management Memo XX). Departments are strongly advised to use great caution in considering financing to avoid over extending their operating expense budgets. Be advised that requests will **not** be entertained for budget augmentations to fund financed contracts previously entered into with baseline funding.

Use of Financing Arrangements Other than GS \$Mart. Use of any financing arrangement other than GS \$Mart, even utilizing baseline budget resources, is prohibited without prior approval from the DOF. A department proposing such a financing must request approval in writing and must provide an analysis to support the basis for selection of the financing to the DOF support unit. A proposed financing using an arrangement other than GS \$Mart will be subjected to a rigorous evaluation demonstrating that it will provide the state with better terms than GS \$Mart and will provide comparable financial security regarding such issues as tax exempt qualifications, financial health of the lender and the financing's effects on the state's credit rating.

Reporting Requirements. In addition to any reporting requirements of the DGS, all GS \$Mart financing payments must be identified in relevant supplementary budget schedules. An addendum to the supplementary schedule shall also be submitted with the schedule that identifies each financed agreement, the lender, the asset being acquired through the financed agreement, the principal amount of the financing and a summary of the financial terms of the agreement.

Budget Change Proposals (BCPs):

Financing Proposed as Part of a BCP. Departments must indicate if any purchase proposed in a BCP will be financed. If it will be financed, the BCP must indicate whether the financing is proposed through GS \$Mart, the contractor or some other means. The financing fiscal detail must be included on the BCP fiscal detail sheet. If the financing will be other than through GS \$Mart, the department must also include an analysis to support the basis for selection of the financing. A proposed financing using an arrangement other than GS \$Mart will be subjected to a rigorous evaluation as noted above in “Baseline Budget.”

An Augmentation for the Purchase of a Specific Asset. If a BCP (or legislatively provided budget increase that is not part of a BCP) is approved which provides a funding augmentation to pay cash for a specific asset, that asset may not subsequently be financed. If any such asset is acquired through financing, the augmentation provided to pay cash for asset will be reduced from the department’s budget.

Feasibility Study Reports (FSR) and Economic Analysis Worksheets (EAW):

For information technology projects, departments must indicate if any purchase proposed in an FSR will be financed and by what means. Again, financing other than GS \$Mart will be subjected to rigorous evaluation. The financing fiscal detail must be included in the EAW.

Energy Efficiency and Sustainability Project Financing:

GS \$Mart financing may also be used for energy efficiency and sustainability projects. However, the approval of these projects will be based on a cost-benefit analysis to substantiate that there is enough energy savings derived to repay all associated project costs including financing. A Life Cycle Cost (LCC) analysis model is available from the DGS to conduct this evaluation. The LCC model **must** be used for this analysis, and the DGS will not approve any GS \$Mart financing for such projects unless the applicant department certifies that the model has been applied and the results justify the asset acquisition on a cost-benefit basis. Any savings generated—including those necessary to pay for financing the project and any savings continuing after completion of the project—will be retained by the department and not subjected to a budgetary savings reduction by the DOF, if the project was financed within the baseline budget.
