

Overview

Voyager® Fleet Commander Online enables clients to take control of their account maintenance activities and provides total access so clients can observe, update, track and manage fleet operations. To further enhance the industry's most robust and user-friendly fleet management website, Voyager has developed web based training (WBT) for Fleet Commander Online users, offering in depth training on the features and functionality of this web based tool.

New and current Fleet Commander Online users can register and/or log in as one of three user types to access training content specific to their role, including:

- ★ **Drivers:** to learn how to use their fleet cards
- ★ **Fleet managers:** to learn about the full range of functions in Fleet Commander Online, from account maintenance to reporting
- ★ **Report managers:** to learn how to run reports

Certification

In addition to learning from the WBT lessons and self-evaluation questions, each user can complete a final certification exam customized to their user type, based on their unique lesson content. Once the user passes an exam topic, then the WBT rewards the user with a completion certificate that lists each successfully passed exam topic.

Registration and Passwords

To access lessons, users can log in as registered users or use the Lesson Only login option at <https://wbt.fleetcommanderonline.com>. Each user type has a unique password that controls access to user-specific lesson content.

To complete the final certification exam, users must register and then log in as registered users. WBT passwords will be distributed by Voyager Relationship Managers. New passwords will be issued every 60 days and will be communicated to web users via email or can be obtained by calling the Fleet Commander Online Help Desk at (800) 987-6591.
