

**SAM—WASTE PREVENTION AND RECYCLING OF
NON-HAZARDOUS WASTE**

ORGANIC LANDSCAPE WASTE

1930.8

(Revised 12/13)

For all state owned or operated facilities with landscaping: agencies shall reduce the generation of organic waste materials through sustainable practices such as climate-appropriate plantings, reduced plant densities, and grasscycling; and divert from disposal as much as feasible of all organic landscape materials through composting, mulching, anaerobic digestion, or other acceptable organic materials management activity.

For more information on recycling green and organic waste materials: <http://www.calrecycle.ca.gov/Organics/>
