

SAM – REAL ESTATE SERVICES DIVISION

STATEWIDE REAL PROPERTY INVENTORY

1310.7

(Revised 6/2014)

The DGS' Responsibility

DGS is required to maintain a complete and accurate statewide inventory of all real property held by the State of California. This is called the Statewide Real Property Inventory (SPI) and is a comprehensive database of all state proprietary land holdings.

Agency's Responsibility

State agencies that acquire, encumber, or dispose of real property are required to provide information to DGS for inclusion in the SPI and routing to the Secretary of State Archives. For assistance in determining the appropriate documents to be submitted, contact RESD's SPI Unit at (916) 375-4052.
