

SAM—TRANSPORTATION SERVICES

REPLACEMENT SCHEDULE CRITERIA

4126

(New 2/2016)

To assist agencies with determining replacement schedules and budgeting needs for state-owned vehicles, the following schedule may be used:

Authorized emergency vehicles as defined in Section <u>165</u> of the Vehicle Code, that are equipped with emergency lamps or lights described in Section <u>25252</u> of the Vehicle Code	100,000 miles
Sedans, station wagons, vans and light duty trucks or vehicles having a gross vehicle weight rating (GVWR) or 8500 pounds or less	120,000 miles
Heavy duty trucks or vehicles (Class 3 and under) having a gross vehicle weight rating (GVWR) of 8501 pounds or more	150,000 miles
4-wheel drive vehicles	150,000 miles

The schedule above is to be used as a guideline and not an absolute standard; OFAM may require additional justification for disposing of a vehicle that meets these standards. A state-owned vehicle may be disposed of or replaced when it is determined that it would be cost-effective to do so, regardless of age or mileage. All vehicles being disposed of require a Property Survey Report STD. 152. An OFA 6 shall also be submitted as applicable. An evaluation will be made by an Inspector of Automotive Equipment to determine whether a vehicle should be disposed of or can be safely and economically continued in service and an OFA 6 shall be provided. The decision whether to retain, reutilize, or dispose of any vehicle not meeting the minimum replacement criteria shall be based on an inspection of the following factors:

- Current mechanical condition;
- Previous maintenance and repair record;
- Extent of needed repairs and availability of parts and life expectancy of vehicle after repair;
- Current sale value;
- Cost and availability of replacement unit and accessories;
- Owning agency's ability to replace unit.
