[Guide to the Nonresidential CALGreen Code](#)

The commission is pleased to offer a Guide to introduce the new 2010 California Green Building Standards Code. This guide provides valuable information concerning the application of CALGreen and how to use it. We hope you will find it helpful and user-friendly.

The CALGreen Guide is a product of the commission's Education & Outreach efforts that were launched in 2009. The goal is to keep the public and industry stakeholders informed and updated on new codes and changes that routinely take place during code development.

Additionally, commission staff is actively conducting introductory CALGreen educational programs throughout the state. Several training opportunities are listed in this edition of CALCode Quarterly. In the event you have yet to identify a training program let us know: CBSCTraining@dgs.ca.gov
