Subject: Greywater : Public comment period open for CA code

Dear Dave Walls,

My name is Felicia Ong, and I live in San Francisco, CA. Thank you for the much needed new greywater code in our state of California. It seems like a no-brainer these days to conserve water when it is such a precious commodity ie. for our crops.

I am excited to use greywater from my washing machine and other single fixture systems to water my garden soon. The no-permit requirement for this is an extremely important aspect to my setting up a greywater system at home.

I have done some reading on greywater systems..the best principle is simplicity, and the removing of barriers like permits and fees.

Once again, thanks so much for making this happen.

Regards

Felicia Ong
