Re: Comments on the new Greywater Code

Dear Mr. Walls,

I'm Lola Terrell, and I live in Los Angeles CA. I was very happy to hear about the new greywater code for the state of California, and think the no-permit requirement for washing machine and single fixture systems is /a very important aspect of the code/. This will make simple greywater systems economical for Californians seeking to conserve water (bless them!). The 12 requirements for the no-permit systems will protect environmental and public health, while supporting the reuse of greywater.

I implore you to keep that part of the code intact and continue in this vein of removing the barriers of permits and fees for simple sustainable practices that everyday people can take - people want to help (empowering), save themselves money (practical), and know they are a part of a solution (community). This is a great way to allow that. Thank you.

Sincerely,

Lola Terrell
