Attention: Thomas L. Morrison, Deputy Executive Director

Re: Comment on Proposed Changes to Building Standards of the  
California Building Standards Commission

Dear Mr. Morrison;

Pursuant to the California Building Standards Commission's Notice of Proposed Changes dated July 18, 2006, the Communications Industry Coalition ("Coalition") hereby voices agreement with modifications to the California Electrical Code (CEC) California. Code of Regulations, Title 24, Part 3 proposed by the Department of Housing and Community Development (HCD). These modifications are contained in HCD's July 14, 2006 revision of its Proposed Expressed Terms.

HCD's proposed modifications will protect the health and safety of Californians, but also assure that Californians will continue to enjoy expeditious access to the benefits associated with the deployment of broadband technology-related services including; video, Internet and phone services.

We thank HCD for its tireless efforts and work with the communications industry to assure that HCD's proposes changes to the CEC further both the public safety and California's state-wide interest in a robust communications infrastructure.

Respectfully submitted,

The Communications Industry Coalition
