

NOTICE

To: Whom It May Concern

From: Dave Walls, Executive Director
California Building Standards Commission

Subject: Notice of Preparation (NOP) on cross-linked polyethylene (commonly abbreviated as "PEX")

It was brought to our attention that a draft copy of the NOP regarding the preparation of an Environmental Impact Report (EIR) for statewide regulations that would allow the use of PEX tubing was inadvertently released to the public. If you received a copy of the draft NOP, please disregard it.

Additionally, please do not respond to the draft copy of the NOP. It is anticipated that a final NOP will be released on October 31, 2007. The final NOP will also be posted on the California Building Standards Commission web site at www.bsc.ca.gov. The October 31, 2007, version of the NOP will be the final NOP and all comments will be welcomed during the official comment period identified in the notice.

We apologize for any inconvenience or confusion that this may have caused. If you should have any questions regarding this notice or the NOP for PEX, please contact the California Building Standards Commission at (916) 263-0916.
