AUTHORITY AND REFERENCE

The California Building Standards Commission proposes to adopt these building standards on behalf of DSA-SS under the authority granted by Health and Safety Code Section 18928. The purpose of these building standards is to implement, interpret, and make specific the provisions of Education Code Sections 17280-17317 and 81130-81147.

The Division of the State Architect is proposing this regulatory action based on Education Code Sections 17310 and 81142.

INFORMATIVE DIGEST

Summary of Existing Laws:

Sections 17310 and 81142 of the Education Code authorize the State Architect to establish building standards for the design, construction and inspection of public elementary and secondary schools, and community colleges.

Summary of Existing Regulations:

At the direction of the Building Standards Commission, Part 11 of Title 24, which is currently vacant, will contain California's green building standards. These standards will be coordinated with, and may reference existing laws and regulations (e.g. Title 24, Part 6 energy efficiency standards) pertaining to resource and energy conservation and environmental quality.

Summary of Effect:

DSA is proposing administrative provisions for inclusion in Part 11 which identify DSA's promulgating and enforcement role of green building standards for public schools and community colleges. Additionally, these administrative provisions may identify resources and additional information regarding DSA's process for development of green building standards to be adopted into Part 11 at a future date. This proposed action does not prescribe nor mandate green building requirements for public schools and community colleges at this time.

Part 11 provisions adopted within the 2007 rulemaking cycle will establish the initial framework for development and integration of DSA's voluntary and/or mandatory green building standards into Title 24 during the 2008 and/or 2009 annual rulemaking cycles.

Comparable Federal Statute or Regulations:

There are no comparable federal regulations or statutes.

Policy Statement Overview:

The broad objective of green building standards for public schools is to promote conservation of natural resources, reduce construction impacts on the environment, and improve the indoor environmental quality of classrooms. Environmental aspects of classrooms such as indoor air quality, lighting and acoustics directly affect the health, well-being, and productivity of students and faculty, as documented by the following sources:
