Subject: Greywater code for California

Dear Dave Walls,

I am very pleased with the new greywater code for the state of California. I think the no-permit requirement for washing machine and single fixture systems is a very important aspect of the code. This will make simple greywater systems economical for Californians seeking to conserve water. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

I think this is very important considering the drought that we are in, and the wildfires in Southern California. We need to all be more sustainable in our use of water these days.

Sincerely,
Dana Davis
Petaluma, CA
