Subject: California Greywater Code

Dear Mr. Walls,

My name is Diana Foss, and I live in San José. I am writing to comment on the new code for greywater systems in California, and I am very happy that the permit requirement has been lifted for washing machine and single-fixture systems. This will allow much greater use of greywater, which will only become more and more important in the future. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

Thank you very much,

Diana Foss
