**Subject:** Yes on Graywater Code!

Dear Dave Walls,

I live in the San Francisco Bay Area of California. I am very supportive of the new greywater code for the state of California and the no-permit requirement for washing machine and single fixture systems. This will make simple greywater systems economical for Californians seeking to conserve water, which is hugely important in our day and age.

The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

Sincerely,  
Lindsay Dailey
