Mr. Dave Walls,

My name is Victoria Tomikawa, and I live in Los Angeles. I understand that right now is the time for public comment regarding graywater use. The No-permit for washing machines and single fixture systems are crucial now more than ever. The 12 requirements will protect us, and at the same time make graywater use affordable for ordinary citizens.

Please make sure this part of the revised code is kept. It will help everyone including those who can't arrange for a graywater system because it will take some pressure off the regular water system. This is obviously important especially now during this drought.

Thank you for your attention.

Victoria R. Tomikawa
