Subject: Greywater

Dear Dave Walls,

A new Greywater Code is so needed and I am glad that there's action on the topic. I especially like the no-permit requirement for washers and single fixture systems. There is no doubt that California has a water problem - making it easier to use greywater can surely help. Do retain the 12 requirements for the no-permit systems and continue in the direction of making it easier for people to install greywater systems. Some publicity on the topic would be good too!

Thanks!
