Subject:

Dear Mr. Dave Walls,

My name is Cecilie Hoffman. I live in Mountain View, CA 94043 (there are two towns with the same name, one in northern CA, one in southern CA).

I like my plumber and he is interested in the greywater project I have planned but he won't do the work until the code restrictions are lifted or the no-permit work is made "official".

I am very pleased with the new greywater code for the state of California, and think the no-permit requirement for washing machine and single fixture systems is a very important aspect of the code. This will make simple greywater systems economical for Californians seeking to conserve water. The 12 requirements for the no-permit systems will protect environmental and public health, while supporting greywater reuse.

Please keep that part of the code intact and continue in this direction of removing barriers of permits and fees for simple sustainable practices.

Sincerely,
Cecilie Hoffman
