

**UPDATED INFORMATIVE DIGEST
FOR
PROPOSED BUILDING STANDARDS
OF THE
DIVISION OF THE STATE ARCHITECT - STRUCTURAL SAFETY**

**REGARDING THE 2010 CALIFORNIA BUILDING CODE,
CALIFORNIA CODE OF REGULATIONS, TITLE 24, PART 2**

The Division of the State Architect (Structural Safety) finds that no revisions have been made that would warrant a change to the informative digest contained in the Notice for Title 24, Part 2.

Summary of Existing Laws

Section 16022 of the Health & Safety Code authorizes the State Architect to establish building standards for state-owned or state-leased essential services buildings.

Sections 17310 and 81142 of the Education Code authorize the State Architect to establish building standards for public elementary and secondary schools, and community colleges.

Section 81053 of the Education Code directs the State Architect (DGS) to establish building standards for use by community colleges that elect not to utilize the Field Act.

Summary of Existing Regulations

Building design, construction and inspection standards for state-owned or state-leased essential services buildings, public elementary and secondary schools, and community colleges are promulgated by the Division of the State Architect-Structural Safety.

These regulations are contained in Part 2 of Title 24, also known as the California Building Code. Existing regulations in Part 2, Title 24, are based on the adoption by the State of California of the 2006 edition *International Building Code*.

Summary of Effect of the Proposed Regulations

The proposed action would update Part 2 of Title 24 by:

- Adopting the most recent edition of the selected model building code, the 2009 edition *International Building Code*.
- Integrating continued structural safety amendments into the updated Part 2 of Title 24.
- Repealing existing amendments deemed to be sufficiently addressed by the adopted model building code and referenced standards.
- Updated existing California amendments as required for coordination with the 2009 IBC and its referenced standards.

Comparable Federal Statute or Regulations

There are no comparable federal regulations or statutes.
