

Tip for the DSA Certification Box

Sort Tip: Some web browsers do not fully support the sort feature within the Certification Box. In these cases, set the sort option on the first screen so that you will have an easier time locating the files you want in the subsequent folders.

The sort option is set by clicking on the  icon and selecting Name, Date or Size. Repeating this action will reverse the order of the sorted items.

The screenshot shows the 'DSA Certification Box' interface. At the top, there is a folder icon and the text 'DSA Certification Box'. Below this is a 'Download' button with a downward arrow icon. A grey bar contains the text 'DSA folders for projects that are Occupied Without Certification and Certified projects.' Below this bar are two folder entries: 'Certified Projects' (Updated yesterday by Anne Sutton, 7711 items) and 'Occupied Without Certification' (Updated yesterday by Ari Perelmuter, 19359 items). On the right side, a sort menu is open, showing options: 'Sort by', 'Name' (selected with an upward arrow), 'Date', and 'Size'. The sort menu is circled in red.
