

# Achieving California's 20% Energy Reduction Goal

Governor Schwarzenegger's Green Building Order S-20-04

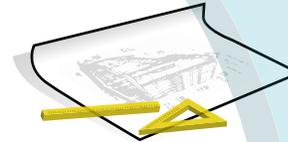

## Benchmarking

- Establish 2003 Baseline
- Compare energy usage
- Identify potential opportunities
- Measure savings

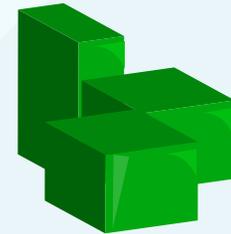

## Retro-Commissioning

- Diagnose and correct operational problems
- Optimize building systems
- Identify cost-effective retrofits
- Produce operations manual
- Repeat every 5 years
- At least 8% savings

## Energy Efficiency Retrofit Projects

- Update to more efficient systems
- Reduce water use
- Improve Indoor Air Quality
- Improve building infrastructure
- Continuous improvements
- At least 12% savings

**GBI Goal**  
**20% Reduction by 2015**

## State agency Responsibilities

Leader assigned to oversee benchmarking of agency buildings

RCx Projects Budgeted

Action Plan Developed to implement energy efficiency projects and green operations
