COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING

STATEMENT OF WORK

Crown Pointe Technologies - Modification of TMAS Software for Competency Testing

This Statement of Work ("Agreement") reflects the services to be provided by Crown Pointe Technologies, Inc., hereinafter referred to as the "Contractor," for the Commission on Peace Officer Standards and Training, hereinafter referred to as POST.

SCOPE

The Contractor will modify its proprietary Testing Management and Assessment System (TMAS) software to accommodate the assessment and scoring of the essential Basic Academy cognitive and psychomotor competencies measured by the POST academy Work Sample Test Battery (WSTB) and the POST Entry-Level Law Enforcement Test Battery (PELLETB) including reading comprehension, situational reasoning, critical thinking, problem solving, writing ability and decision making. The test scoring procedures will be based on both individual and composite subscales and will report test results accordingly.

Phase 1 – Analysis of Modifications

Contractor will provide POST with a detailed requirements document listing the modifications required to the Testing Management and Assessment System (TMAS) software to accommodate the assessment and scoring of all Basic Academy competencies measured by the WSTB and PELLETB.

Phase 2 – Modifications to the Learning Objective and Test Item Systems

Modifications to the Learning Objective and Test Item system records to provide for scoring methods associated with each competency dimension.

WSTB Scoring Method– to address each WSTB competency:

1. Yes/No – Has the person being tested met the testing requirements of the WSTB competency tested?
2. Levels of Performance – A scoring scale based on a POST-defined rubric with a set passing point.

PELLETB Test Scoring Method

1. Provide for the ability to set individual weights associated with each PELLETB competency dimension.

Phase 3 – Modifications to Test Creation and Test Session Scheduling Systems

1. Modifications to Test Creation System to provide for individual and composite cognitive competency testing; define the type of test items that can be used on each type of competency. Changes will also need to be made with reference to the Computed and POST cutoff scores to make them applicable to these types of test formats. Modifications will also be made to the Test Printing capability to reflect the type of test being administered and other relevant information
2. Modifications to the Test Session Scheduling System to accommodate for the differences required by the new type of test format. This will include the changes required to provide test proctors with information on the type of scoring that will be utilized (individual and composite) and the scoring rubrics that will be used for the process.

Phase 4 – Modifications to create and modify new and existing Reports to accommodate individual and composite cognitive competency testing

1. **New Reports** will need to be created to reflect the scoring for individual and composite competency testing models for both the WSTB and PELLETB competency assessments.
2. **Current Reports**, of which there are many, will need to be modified to reflect the scoring for individual and composite competencies wherever applicable. Approximately 80% of all existing reports will have to be modified or additional new reports created.

Phase 5 – User Acceptance Testing of individual and composite competency Modifications

A period of User Acceptance of the modifications to the Testing Management and Assessment System (TMAS) software to accommodate the assessment and scoring of essential Basic Academy cognitive competencies, including individual and composite scoring will be conducted before the modifications will become operational. Contractor will conduct its own testing of the modification prior to making it available for user testing. Contractor will train POST personnel in the use of the new features and functions created during the modifications. Contractor will create user testing specifications and work with POST personnel to train them in the use of the testing specifications to assure a thorough user testing the modifications has been completed.

PERIOD OF PERFORMANCE

The term of Agreement is effective upon the date the Purchase Order is signed through June 30, 2008.

AMOUNT

Total amount of this agreement is \$199,000.00.

CONTRACTOR REQUIREMENTS

Contractor will provide delivery of the TMAS system modification in five (5) phases. Payment will be contingent upon successful completion and acceptance of each stage.

BILLING INFORMATION

The Contractor shall submit invoices (including the purchase order number) to the following address:

Commission on POST
