EDR Environmental Database Package	

INTRODUCTION

This Environmental Site Assessment (ESA) presents our findings, conclusions, and recommendations regarding the potential for ground contamination resulting from the discharge of hazardous materials to adversely impact the Orange County Fair and Event Center property. This ESA was prepared for the State of California, Department of General Services, Real Estate Services Division.

This site assessment was performed as a non-intrusive ESA study, evaluating land use and reviewing the status of regulatory agency oversight for indicators of the presence of potential hazardous materials. A review of public records and a site reconnaissance were performed to verify current conditions and potential impacts at the project site and from adjoining properties. This report discusses the work performed and our findings and conclusions regarding the likelihood that hazardous material may have been discharged to the soil, ground and/or groundwater environment at the project site. This study serves as an initial means of screening the property for potential contamination with the objective of identifying areas requiring additional assessment.

PROJECT DESCRIPTION

The proposed project consists of the sale of the property that is currently occupied by the Orange County Fair and Event Center (OCFEC) located in Costa Mesa, California, as shown in Figure 1. The State intends to execute a Purchase and Sales Agreement with the interested party or parties who, in the sole discretion of the State, pose the best opportunity for the State to achieve the highest and most certain return for the Property from a responsible bidder. The Property is being sold “as-is”, with the exceptions that a reservation of mineral rights as required under the Authorizing Legislation and that the State requires a profit participation as a deed restriction in the event all or any portion of the Property receives City entitlements for uses other than the Property’s current use as a fair and event facility. Currently the Title to the Property is held by the 32nd District Agricultural Association (32nd DAA), a state entity within the Division of Fairs and Expositions, California Department of Food and Agriculture. The 32nd DAA, operates the Property as the OC Fair and Event Center which is a fairground and event facility that hosts an almost year-round calendar of events.

WORK PERFORMED

A phased approach was utilized to evaluate the potential for hazardous materials at the project site. A brief review of the historical land use and the existing conditions was conducted, consisting of review of aerial photographs, topographic maps, and historic city directories for the project area, to identify land use and to verify possible sources of hazardous materials. A questionnaire was submitted to OCFEC staff familiar with hazardous materials use and storage; however as of the date of preparation of this report

Figure 1: Project Location Map

none had been returned. A review of an environmental database search (EDR, 2009) of records of Federal, State, and local regulatory agencies that oversee the storage, handling and/or unauthorized release of hazardous substances to help identify properties/sites with potential hazardous material uses and/or contamination issues that may have resulted in contamination at the Project Site. The field reconnaissance component of the study, conducted by an environmental geologist, consisted of a visual survey of surface conditions. The purpose of the survey was to identify sites where storage containers (chemicals, paint, and oil) were present, and evidence of stained soil, or corroded pavement was visible suggesting chemical spillage to the ground. This survey concentrated on the Project site and hazardous material sites identified in the EDR database. The site reconnaissance of the Project site consisted of a tour of the exterior and interior of the fairground facilities in the presence of Jeff Davis of the OCFEC, and was concentrated on areas where hazardous materials are used and stored. The reconnaissance of sites identified in the EDR database was limited to viewing properties from adjacent public streets; no attempt was made to gain access to any of these properties.

The assembled data was analyzed for indicators of environmental contamination with the objective of determining the potential impacts to the project and the need for additional environmental assessment. Results of this assessment are discussed in this Initial Site Assessment report.

FINDINGS

PHYSICAL SETTING

The OCFEC is located on the Newport Mesa, a broad flat-topped coastal mesa situated at an average of 50 to 75 feet above mean sea level (msl) that is situated between two principal drainages, the area of the Santa Ana River located to the west and the Newport Bay Estuary area located to the east. The Newport Mesa is a Pleistocene wave cut bench characterized by nearly horizontal Quaternary terrace and alluvial deposits (ancient near shore marine and terrestrial deposits) over bedrock. The OCFEC is located near the center of the Mesa at elevations of approximately 70 to 52 feet above msl sloping gently to the northeast. Groundwater within the Newport Mesa area is primarily perched water and ranges in depth from approximately 35 feet to greater than 90.

Another major geologic structure in the region near to the OCFEC is the Newport-Inglewood Fault Zone (NIFZ), which is located less than a ¼ mile southwest of the site. This fault zone is a major strike-slip, northwest-southeast trending fault of the San Andreas Fault System zone, which has resulted in deformation and active faulting which has warped and offset Tertiary and Pleistocene sedimentary rocks.

CURRENT SITE CONDITIONS/LAND USES

Project Site. The OC Fair and Event Center is located at 88 Fair Drive in Costa Mesa and is bounded by Arlington Drive on the north, S. Newport Blvd. on the east, Fair Drive on the south, and Fairview Rd. on the west. The fairgrounds are approximately 150 acres in size and consist of numerous buildings and facilities, including an equestrian center, grandstand arena, a small working farm (Centennial Farm), a maintenance yard, an amphitheater (Pacific Amphitheatre), and miscellaneous fairground buildings used for exhibits and animals. The Orange County Fair and Event Center has occupied the current property since 1949 when the State purchased the former Santa Ana Army Air Base and set aside a portion of the property for the Orange County Fair.

The OCFEC is a year-round exhibition, conference, and event center, however its primary function has been to host the annual summer Fair. Year-round events and exhibitions generally occur at the Fairgrounds every weekend and the Orange County Marketplace, a large swap meet, occupies a portion of the OCFEC parking lot every weekend except when the summer Fair is in session.

The OCFEC complex currently consists of the following major components/facilities, as shown on Figure 2:

- Pacific Amphitheater – an open-air arena which provides fixed seating for 8500 spectators and has an approximately 6000 sq. ft. stage area. Facilities within the amphitheater include concession stands and backstage trailers for performers. The amphitheater is generally only used for concerts and events during the summer fair. The amphitheater was opened in 1983, but was closed due to noise issues from 1995 through 2003, when it reopened for the 2003 summer Fair.
- Grandstand Arena – a 7500 seat outdoor arena used primarily for rodeos, circuses, and motorcycle races, and other outdoor events.
- Exhibit Buildings – several buildings located throughout the fairgrounds which are rented out for various shows and used during the summer fair. There are five main exhibit halls, which includes the new hangar exhibit building which currently under construction. The new 31,000 sq. ft. hangar exhibit building is under construction as part of the OC Fair and Event Center 2002 Master Plan capital improvements plan.
- Equestrian Center – the Equestrian Center has existed at the OCFEC for more than 20 years and is used for boarding and training of horses and occasional horse shows. The Equestrian Center currently occupies approximately 11.5 acres of the OCFEC site, and is located in the northeastern corner of the property. The Equestrian Center consists of 9 barn structures, an office structure,

- a maintenance and storage building, and several riding arenas, corrals, and training areas.
- Centennial Farm – a 4-acre working farm used for educational purposes. It includes several buildings and stables and agricultural land used to grow crops for the educational program. Livestock animals are housed here year round also for use in the educational programs.
 - Outdoor Grass and Asphalt Space – there are several outdoor grass and asphalt covered open space areas used for various events, these areas are designated by the following names: Festival Fields, Main Mall, Park Plaza, and Crafters Village. An additional paved area is used as a RV campground and includes some hook-ups for these vehicles.
 - Operations and Maintenance Yard and other Maintenance Buildings – the operations and maintenance yard area consists of three buildings, a housing maintenance and operations office, a shop building, and a warehouse. Also in this area are the vehicle maintenance areas, a vehicle washdown area, vehicle fueling area, and vehicle and equipment storage. Additionally there are several separate buildings located along the northern edge of the fairgrounds property where miscellaneous maintenance and event and fair related operations are based out of, including a relatively large welding and repair shed/building.
 - Administration Building – a new 14,000 sq. ft. administration building was completed in September 2009 and now houses a variety of departments related to the administration, marketing, and business services for the OC Fair and Event Center.
 - Parking Lots – there are nine parking areas located around the western, southern, and eastern perimeters of the fairground. These lots can be rented for use for events. Lot A is used on weekends for the Orange County Marketplace.

A site visit by an Environmental Geologist was conducted on December 11, 2009 and revealed an apparently clean site with no evidence of past activities that typically cause environmental contamination. The tour of the OC Fair and Event Center facilities was conducted by Jeff Davis, the OC Fair and Event Center Maintenance Operation Supervisor, who is familiar with the hazardous material storage and disposal practices at the facility. The tour revealed that hazardous materials such as solvents, paints, and other hazardous materials are generally stored safely in cabinets. Small amounts of various lubricants, adhesives, and paints are stored in cabinets and on shelves in various shops of the maintenance buildings, as shown in Figure 3.

Figure 3: Storage of Hazardous Materials

A 1000 gallon two-chambered aboveground storage tank (AST) for gasoline and diesel fuel is located neat the southwest corner of the maintenance yard. This AST is located on a concrete pad within a spill basin. 55-gallon drums for disposal of waste chemicals and waste oils are stored in an outside covered storage area behind the fuel AST and are disposed of on an as needed basis, approximately annually, by a hazardous materials disposal company. Empty drums are stored nearby. Fuel cans for vehicle and equipment refueling are stored in a locked storage cabinet adjacent to the waste drums. The location and arrangement of these items are shown in Figures 2 and 4.

Figure 4: Aboveground Fuel Storage Tank and Hazardous Waste Disposal Drums

There are at least 16 electrical transformers located throughout the property with each located within a fenced/walled area. An example of one of these transformers is shown in Figure 5. No visual evidence of leaks were observed near the transformers and fairground staff indicated that they have no knowledge of any leaks or problems with the transformers. Throughout the fairgrounds main facility the surface of the exposed paved areas surrounding the buildings were generally clean and showed no evidence of hazardous material spills, and no surface trash was observed. Minor surficial staining due to drips from parked automobiles was noted in the parking areas.

Figure 5: Onsite Transformer

Surrounding Area. A reconnaissance survey by an Environmental Geologist was conducted on December 11, 2009 and consisted of visual survey of sites from adjacent public roads. Land uses in the project area consist primarily of a mix of educational, residential, governmental, and commercial. Land use designations include: Public/Institutional and Low Density Residential to the north; various land use designations to the east across Highway 55, the Costa Mesa Freeway, including Neighborhood Commercial and High Density Residential; Public/Institutional, Neighborhood Commercial, and High Density Residential to the south; and Low Density Residential and Public / Institutional to the west.

North of the OCFEC, across Arlington Ave. are, from west to east, Costa Mesa High School, Davis Elementary School, and TeWinkle Park and Sports Complex, with primarily single family residential north of these facilities. Orange Coast College and single family

residential properties are located west of the fairgrounds across Fairview Avenue. South of the fairgrounds across Fair Drive from west to east, are Vanguard University, the City of Costa Mesa Civic Center and Police Headquarters, Civic Center Park, an Arco gas station, and south of the park multi-family housing consisting of apartments and condominiums. The east side of the fairgrounds is bordered by the southbound lanes of Newport Boulevard, with Highway 55 just east of and parallel to Newport Boulevard. Commercial and mixed residential properties are located east of Highway 55 and the northbound lanes of Newport Boulevard. Highway 55 is below grade in this area and is approximately 20 to 30 feet below the project site and serves as an effective barrier.

HISTORIC LAND USE

Historic land use of the proposed Project Site and surrounding area was reviewed using historic topographic maps, historic aerial photographs, historic city directories, and the internet. Prior to the 1940's the Project area was primarily undeveloped, agricultural, and rural residential. In 1941 the military acquired a little over 1300 acres in the Project area, which became the Santa Ana Army Air Base (SAAAB).

The Army Air Corps used the SAAAB initially as a pilot training facility between March 1942 and October 1944, however no planes were ever used at the facility it was strictly a basic training and educational setting. The use was as a classification and pre-flight training facility for pilots, navigators and bombardiers, and from 1942 through 1944 approximately 149,400 entered the training, about 128,000 graduated (Costa Mesa Historical Society website, 2009). It then became an Overseas Replacement Depot (ORD) housing Army Air Forces personnel awaiting transportation overseas, a redistribution center for airmen returning from overseas to be assigned state-side duty, and convalescent hospital. The base was built to serve 20,000 personnel. SAAAB continued as a redistribution and separation center for a short time after the war. On March 31, 1946, the base was officially deactivated (California State Military Museum website, 2009). During its operation, more than 800 buildings were constructed on the base, including 1,357,120 sq ft of barracks, 28 Convalescent Hospital Wards, 18 School Buildings, 155,000 sq ft of Administration buildings, 4 chapels, 4 theaters, and 17 warehouses.

After site was declared inactive and surplus the site was split-up and sold to various entities and has approximately 2,800 owners. The site, at present, contains the Orange County Fairgrounds, Costa Mesa City Hall, Orange Coast College, Pacific Amphitheater, Vanguard University (formerly Southern California Bible College), Costa Mesa Air National Guard Station, and several residential and retail/commercial tracts. Some of the original buildings have been renovated and are being used by the present owners (California State Military Museum website, 2009).

Project Site. The land currently occupied by the OCFEC was originally part of the Santa Ana Army Air Base, and was purchased by the State after the base was closed and was earmarked specifically for a new fairground. The Fair was first held at the new

site in 1949 and it soon was designated as the permanent Fairgrounds. From 1949 to the present, the OC Fair has grown from a small, community, five-day celebration to a 23-day festival and included in this growth has been the construction of many new buildings on the property over time and remodeling of previously existing buildings.

REGULATORY AGENCY RECORDS SEARCH AND REVIEW

Environmental Data Resources, Inc. (EDR) (2009) performed an environmental data search of Federal, State and local directories listing sites with known releases of hazardous materials, facilities registered as hazardous waste generators, sites with registered underground storage tanks (USTs), and sites once considered likely to use or store hazardous substances. The principal regulatory directories reviewed by EDR, including the date last updated, are listed in the appended Radius Map with GeoCheck Report (December 2009). The EDR study identified all sites with active or closed environmental status, within a 1-mile radius of the Fairgrounds boundary. The database was reviewed for sites with the greatest potential for environmental impact to the Project site, which would generally consist of large superfund sites within the database radius, UST and leaking UST sites within 0.25-miles of the Project site, and large quantity hazardous material generators adjacent to the site.

Potential Contamination Criteria. Businesses and activities commonly associated with potential environmental contamination include industrial manufacturing, active and former gas stations, automotive repair and body shops, and agricultural practices involving the use of pesticides and herbicides. Properties with leaking USTs generally represent the greatest environmental risk. A high potential for adverse environmental impacts to the soil materials occurs with leaking underground tank sites (LUSTs).

Moderate potential for adverse environmental impacts to the subject site could result from adjacent sites with active USTs or with an unknown number and/or condition of USTs in areas with shallow groundwater. Large quantity hazardous waste generators, adjacent USTs in areas of deep groundwater, and non-adjacent UST sites separated by properties or numerous streets would represent a low potential for adverse environmental impacts. Potential impacts from hazardous waste generators, sites listed as case closed, and distant properties are negligible.

EDR Record Review. Approximately 150 sites were identified in the EDR database search with many of the sites listed on numerous regulatory databases and listed several times within the database. For this impact analysis, the EDR database search information was reviewed and analyzed for sites within 0.25 miles of the Project Site, approximately 59 database listings representing approximately 22 properties/sites. Sites located further than 0.25 miles from the Project Site were judged to have no potential to have resulted in environmental contamination at the Project Site because none of these sites were found to contain large areas of known contamination nor were any large contaminated plumes identified within 0.25 to 1.0 miles from the project site and groundwater is generally greater

than 30 to 50 feet in depth in the area. Sites within 0.25 miles of the Project Site in the EDR database were then reviewed for sites with known environmental contamination and for sites with potential to have resulted in environmental contamination at the Project Site. Many of the sites reviewed in the EDR database search are not hazardous materials release sites (known contaminated sites), but rather are listed as facilities that use, store, or have disposed of hazardous materials offsite. Based upon the criteria above, sites listed in the environmental database were then reviewed based on distance from the alignment, type of site, and regulatory status of the site. Based on these characteristics, a determination was made whether the site would have potential to impact the project.

Eight sites with underground storage tank listings are located within the 0.25-mile radius. The sites with UST tank listings have low potential to have resulted in environmental contamination at the Project Site and are summarized below in Table 1. Five of the UST sites are also listed as known leaking UST (LUST) sites. However four of the five LUST sites have been classified as cleanup completed and case closed by the County of Orange Local Oversight Program (LOP) of the County Environmental Health Division, as noted in Table 1.

The fifth LUST site, the Costa Mesa Air National Guard site at 2651 Newport Boulevard (located approximately 0.1-miles north of the northeastern corner of the Project Site) is a case closed LUST site, however this site is also listed in the MCS, Cal-Sites, and ENVIROSTOR databases as a site with known contamination issues in the soil and the groundwater (groundwater level is at 40 ft bgs at this location) (EDR, 2009; ANG, 2002). Contamination at this site has been noted at several locations within the site, primarily at current and former fueling and vehicle maintenance areas, and is largely confined to the soil (ANG, 2002). Groundwater testing conducted in 2002 as part of the Environmental Baseline Survey conducted for the site indicated low levels of TCE in the groundwater at 40 ft bgs with groundwater flow direction to the southwest. However a sample taken from a well just north east of the site had higher levels of TCE, indicating that the groundwater contamination may have had an offsite source (ANG, 2002). Although the DTSC has recommended further investigation of this site, the Air Force has deferred any further actions or investigation until the Costa Mesa Air National Guard is relocated (DTSC ENVIROSTOR website, 2009). Due to the unknown distance that contamination from this site may have spread, and despite the relatively deep groundwater in the area and separation from the Project Site, this location has a low to moderate potential to have resulted in environmental contamination at the OCFEC.

All other sites within the 0.25-mile radius of the site consist of sites which store, use, and or dispose of small quantities of hazardous materials and therefore have negligible potential to impact the Project Site. No sites with a significant potential to have resulted in environmental contamination to the Project Site were identified.

Table 1: UST Sites within 0.25-miles of Project Boundary

EDR ID ¹	Site Name	Address	Regulatory Agency List ²	Potential to Impact Project	Notes
A1-A4	Orange County Fairgrounds	88 Fair Drive	HAZNET, RCRA-SQG, FINDS, UST	Low	The site is listed as having an UST onsite, however interviews with staff indicated this tank had been removed. A review of County of Orange Environmental Health Division (COEHD) records indicates that the 1000 gallon UST was removed in October 1997. The tank was found to be in good condition and no contamination of the surrounding soil was found at the time of tank removal. The UST has been replaced by an AST which is in approximately the same location as the former UST. The site stores and disposes of hazardous waste consisting primarily of used motor oil and other lubricants on an intermittent basis.
E19, E21-E25	Costa Mesa Police Dept.	99 Fair Drive	LUST, UST, HAZNET	Low	Two LUST cases reported for this site, both listed as case closed, one closed in 1987 and one closed in 2005. Site listed as having several fuel USTs. Site is listed as disposing of oil/water sludge and miscellaneous aqueous solutions.
F26, F27, H34-H36	Costa Mesa High School	2650 Fairview Road	UST, HAZNET, FINDS	Low	Site is listed as having one fuel UST and as disposing of miscellaneous laboratory waste chemicals, waste oil, and other aqueous solutions.
G29-G33	Exxon Service Station	2490 Fairview Road	LUST, HAZNET, RCRA-SQG, FINDS, UST	Low	Currently an active Arco gas station. Site is listed as having 4 USTs, three fuel USTs and one waste oil UST. Two LUST cases are listed, both are case closed, one closed in 1987 and the second closed in 1992. Site disposes of mixed petroleum waste.

Table 1: UST Sites within 0.25-miles of Project Boundary

EDR ID ¹	Site Name	Address	Regulatory Agency List ²	Potential to Impact Project	Notes
I37-I42	Jim Tice Shell/Chevron	2590 Newport Blvd.	CORTESE, LUST, UST, HAZNET	None	Site on the east side of Highway 55 and is currently occupied by a strip mall containing several eating establishments. Site had three listed LUST cases, all case closed (1990, 1998, and 2004).
J43-J44	Civic Center Fire Station #5	2450 Vanguard	UST	Low	Site is listed as having one 1000 gallon diesel fuel UST.
L56, L58-L63	Costa Mesa Air National Guard	2651 Newport Blvd	Cal-Sites, CORTESE, ENVIROSTOR, LUST, HAZNET, UST, FINDS, RCRA-SQG, MCS	Low to Moderate	The LUST is case closed as of 1993. The Cal-Sites, MCS, and ENVIROSTOR databases list this site as having known contamination issues in the soil and the groundwater. Contamination at this site has been noted at several locations at this site, primarily at current and former fueling and vehicle maintenance areas, and is primarily confined to the soil (ANG, 2002). Groundwater testing conducted indicated low levels of TCE in the groundwater at 40 ft bgs with groundwater flow direction to the southwest. Although the DTSC has recommended further investigation of this site, the Air Force has deferred any further actions or investigation until the Costa Mesa Air National Guard is relocated (DTSC ENVIROSTOR website, 2009). This site disposes of organic liquids and solids and mixed oil waste. The site is listed as having 2 to 3 USTs, however the Final Environmental Baseline Survey for the site in 2002 indicates that at least one of the tanks has been removed.

Table 1: UST Sites within 0.25-miles of Project Boundary

EDR ID ¹	Site Name	Address	Regulatory Agency List ²	Potential to Impact Project	Notes
P79-P82	Orange Coast College	2701 Fairview Road	UST, HAZNET, FTTS, CORTESE, LUST, AST, UST, FINDS	Low	Site is listed as having between 4 to 7 USTs, with some listed as containing fuel and some listed as waste. Several LUST cases are listed, all case closed and listed as discovered during tank closure. LUST cases closed in 1990 and 2000. Site is listed as using and disposing of PCBs. Listed as disposing of laboratory waste chemicals (solid and liquid), and other miscellaneous wastes. Site is listed as having a 1300 gallon AST.

NOTES:

- 2) See Appendix for Description of Regulatory Agency Listings.

CONCLUSIONS AND RECOMMENDATIONS

PESTICIDE/HERBICIDE CONTAMINATION

Areas currently and historically landscaped may have residual levels of pesticides and/or herbicides that may require excavated soil to be handled as hazardous material. The Project Site is sparsely landscaped with grass and scattered trees. The minor amounts of pesticides and/or herbicides, if any, typically used on landscape areas are unlikely to result in residual pesticide and herbicide contamination. In the Centennial Farm area, there are some agricultural fields planted with a variety of row crops which are used as part of education programs. It is not expected that significant amounts of pesticides or herbicides are used in these areas as the crops grown here are used for educational purposes and given to children to taste, touch, and feel.

POTENTIAL AND EXISTING ONSITE CONTAMINATION

No known soil or groundwater contamination exists within the OCFEC (Project Site). Although no contamination has been noted at the Project Site, there is a small potential that unreported or noted historic and/or recent hazardous material spills at the Project Site may have resulted in localized areas of hazardous substance contamination.

The environmental data search (EDR, 2009) of potential contamination sources identified more than 59 database listings for properties within a ¼ mile radius of the Project Site that use, store, or and/or dispose of hazardous materials, however many of the listings are duplicates for individual sites. The Project Site is included in the database and is listed as a hazardous material generator and as having a UST (document review at the COEHD indicates that this tank was removed in 1997). Most of the sites listed in the ¼ mile radius of the Project Site consist of businesses that store and dispose of hazardous materials and many of these also have USTs.

The likelihood of contamination at the Project Site from nearby UST sites is generally low due to average groundwater depths in the Project Site vicinity of greater than 30 to 50 feet below ground surface (bgs) and fact that the sites with listed USTs are separated from the Project Site by roads, Highway 55, and other intervening properties. Additionally all LUST sites within a ¼ mile radius of the Project Site boundary are listed as case closed. Thus, most of the listed properties currently present little potential to have caused environmental contamination to the Project Site. However, the Costa Mesa Air National Guard site at 2651 Newport Boulevard (located approximately 0.1-miles north of the northeastern corner of the Project Site) has known contamination issues, and due to the unknown distance that contamination from this site may have spread, and despite the relatively deep groundwater in the area and separation from the Project Site, this location has a low to moderate potential to have resulted in environmental contamination at the OCFEC.

The principle environmental impacts involving hazardous waste are the excavation and handling of contaminated soil or groundwater resulting in exposure of workers and the general public. Although no construction is planned as part of the property acquisition, in the event future construction were to occur at the site and contaminated soil and/or groundwater was encountered in the construction area, it may require special handling as hazardous waste and create an exposure risk to workers and the general public during excavation and transport. Contaminated soil and groundwater would require on-site treatment or transport to off-site processing facilities. Contaminated soil removed from a construction area must be transported according to state and federal regulations and be replaced by import soil approved for backfill.

ONSITE STORAGE AND USE OF HAZARDOUS MATERIALS

Hazardous materials are stored in designated storage areas in compliance with local, state, and federal safety regulations. No significant hazardous materials impacts are predicted as a result of continued operation of the OC Fair and Event Center.

CLOSURE

The Project Site appears to be clean, with low or no risk of prior contamination from fairgrounds operations or from nearby sites. Although it is unlikely that soil contamination has spread from the nearby Costa Mesa Air National Guard Station due to deep groundwater levels, in the event future expansion of the facility would require excavations near the northeastern corner of the OCFEC property, soil and groundwater should be monitored during excavation for evidence of previously unknown contamination.

This review of environmental conditions was performed to identify environmental contamination and potential impacts to the proposed Project Site. This assessment relied on review of a database of sites recently under regulatory agency oversight, review of limited historical records, and visual reconnaissance as indicators of potential contamination.

LIMITATIONS

This ESA does not include an analysis or discussion of asbestos, lead based paint, radon, methane, or wetlands. No interviews with local business people or employees familiar of nearby businesses were conducted. The findings and opinions presented in this ESA report are based on information obtained from a variety of sources listed herein, and which Geotechnical Consultants, Inc. (GTC) believes are reliable. GTC cannot and does not guarantee the authenticity or reliability of the information relied upon. ESA reports, by their nature, are limited. GTC has endeavored to meet applicable standards of care and, in so doing, is obliged to advise of these limitations.

The EDR FieldCheck® System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). GEOTECHNICAL CONSLT. INC. used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by GEOTECHNICAL CONSLT. INC.. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the CERC-NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there is 1 CERC-NFRAP site within approximately 0.75 miles of the target property.

METROPOLITAN CIRCUITS INC #2	1261 LOGAN AVE	NNW 1/2 - 1 (0.728 mi.)	AE138	239

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 8 RCRA-SQG sites within approximately 0.5 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the ERNS list, as provided by EDR, and dated 08/31/2009 has revealed that there is 1 ERNS site within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the RESPONSE list, as provided by EDR, and dated 11/09/2009 has revealed that there is 1 RESPONSE site within approximately 1.25 miles of the target property.

METROPOLITAN CIRCUITS	1267 LOGAN AVENUE	NNW 1/2 - 1 (0.731 mi.)	AE140	241

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the ENVIROSTOR list, as provided by EDR, and dated 11/09/2009 has revealed that there are 4 ENVIROSTOR sites within approximately 1.25 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the SWF/LF list, as provided by EDR, and dated 11/23/2009 has revealed that there is 1 SWF/LF site within approximately 0.75 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the CHMIRS list, as provided by EDR, and dated 12/31/2007 has revealed that there are 2 CHMIRS sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 3 RCRA-NonGen sites within approximately 0.5 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

An online review and analysis by GEOTECHNICAL CONSLT. INC. of the HAZNET list, as provided by EDR, and dated 12/31/2008 has revealed that there are 24 HAZNET sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FUDS Description Details:

The Santa Ana Army Air Base consisted of 1336.102 acres. This was made up of 909.453 acres acquired in fee, by condemnation and purchase, 420.74 acres acquired by lease, 5.771 acres acquired by easement, and

SANTA ANA ARMY AIR BASE (Continued)

1009484289

0.138 acres. The site is located in the City of Costa Mesa, Orange County, California. The site, at present, contains the Orange County Fairgrounds, Costa Mesa City Hall, Orange Coast College, Pacific Amphitheater, Southern California Bible College, Air National Guard Station, and several residential and retail tracts. Some of the original buildings were renovated and are being used by the present owners. The lease was terminated when the fee land was conveyed to the College.

FUDS History Details:

The Army Air Corps used the site as a pilot training facility between March 1942 and October 1944. It then became a redistribution center and convalescent hospital and later was a discharge station for returning soldiers. The base was built to serve 20,000 personnel. Finally, before it closed in March 1946, it was a discharge station for soldiers returning from the Pacific. The former site was sold to various entities - Orange Coast College, 32nd Agricultural, and Southern California Bible College. The site currently consists of many residential and retail tracts with approximately 2,800 owners.

Background Info: The Costa Mesa ANG station is an 8.5 acre facility that has been active since 1964. The facility is located on former Santa Ana Army Air Base property. Activities include routine maintenance of vehicles, generators, and various ground equipment. Hazardous wastes resulting from these activities include varying amounts of waste fuels, oils, paints, thinners, and solvents. A preliminary assessment was submitted in December 1990 where a recommendation for NFA was concluded.
Comments Date: 08081991
Comments: Letter sent to Air National Guard (ANG) stating no concurrence

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Agency Telephone: 7144248906

Agency Type: Special District (Includes districts established under general acts, sanitary districts, water districts irrigation districts, etc.)

SIC Code: 0

SIC Code 2: Not reported

Primary Waste: Not reported

Primary Waste Type: Not reported

Secondary Waste: Not reported

Secondary Waste Type: Not reported

Design Flow: 0

Baseline Flow: 0

Reclamation: Not reported

POTW: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Background Info: This site is a printed circuit board manufacturing plant which was operated by Metropolitan Circuits from 1969 to 1981. The facility is presently occupied by Velie Circuits, which has operated a similar manufacturing plant at the location since 1984. During the production of the printed circuit boards, a process was used that involved the plating of copper and other metals. The soils in the chemical handling and storage areas on the site have been contaminated by metals used in this manufacturing process.
The company completed a prior RI/FS in 1985, and developed a RAP for the excavation and removal of contaminated soil. The RAP was approved in February 1986, and the excavation and removal of soil was implemented in September 1986. However, post-excavation sampling revealed that metals were still present in the soils and that they appeared to be increasing in depth. Therefore, in April 1988, the Department issued an RAO to the RPs requiring them to perform additional site characterization and remediation. In 1990, an approved RI Workplan was implemented which included soil sampling and installing 2 groundwater monitoring wells. Results showed that the extent of copper-contaminated was undefined and volatile organic compound (VOCs) were present in the soil and groundwater.
In 1991, additional RI work was completed. The extent of copper-contaminated soil was still undefined, the source of VOCs in the soil and groundwater was not identified, and the groundwater flow direction was unclear.
In 1992, a condensed and conservative Health Risk Assessment (HRA) was prepared by the Department based on information provided in the draft RI Report. The HRA concluded that the soil contaminated with metals and concentrations of VOCs in groundwater, if used as a drinking water source, may pose a significant risk.
After the groundwater flow direction was re-determined, additional investigative work was performed. The purpose of the investigation was to define the copper-contaminated soil area and evaluate groundwater conditions at the site using a cone penetrometer testing (CPT) survey and placing a groundwater monitoring well offsite. The report on this work concluded that available soil and groundwater data for VOCs is insufficient to identify the source or extent of contamination.
Thus, a limited soil investigation was performed in April 1993 for the purpose of determining if site operation contributed to the groundwater contamination of VOCs.

CA BOND EXP. PLAN:

Reponsible Party: RESPONSIBLE PARTY LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: The responsible parties are in compliance with an order issued by the Department for oversight/monitoring of their cleanup efforts. DHS has budgeted \$50,000 for direct costs related to the project. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with cleanup.
Site Description: This site is a former printed circuit board manufacturing plant which operated from 1969 to 1981. The facility is now occupied by Velie Circuits, which has operated a similar manufacturing plant since 1984.
Hazardous Waste Desc: The soils in chemical handling and storage areas on the site have been contaminated by heavy metals utilized in The manufacturing process. These substances include copper, lead, and zinc.
Threat To Public Health & Env: The levels of heavy metals in soil may be increasing with depth, which could represent a potential threat to the ground water. The site is located next to the Paularino Channel which eventually drains to the Upper Newport Bay, a wildlife refuge. There is no known exposure of chemicals to workers at this time because of preventive measures taken at the facility.
Site Activity Status: The company completed a RI/FS and developed a RAP that was approved by the Department if February, 1986. The RAP was implemented in September, 1986 which entailed excavation and removal of contaminated soil. Post-excavation sampling revealed that metals were still present in soils and may be increasing with depth. In April, 1988, DHS issued a RAO to Metropolitan Circuits and Velie

Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 09/01/1996
Facility name: SHELL OIL CO
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Registry ID: 110002714643

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/01/2009	Source: EPA
Date Data Arrived at EDR: 10/14/2009	Telephone: N/A
Date Made Active in Reports: 11/09/2009	Last EDR Contact: 11/13/2009
Number of Days to Update: 26	Next Scheduled EDR Contact: 01/25/2010
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/01/2009	Source: EPA
Date Data Arrived at EDR: 10/14/2009	Telephone: N/A
Date Made Active in Reports: 11/09/2009	Last EDR Contact: 11/13/2009
Number of Days to Update: 26	Next Scheduled EDR Contact: 01/25/2010
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/01/2009	Source: EPA
Date Data Arrived at EDR: 10/14/2009	Telephone: N/A
Date Made Active in Reports: 11/09/2009	Last EDR Contact: 11/13/2009
Number of Days to Update: 26	Next Scheduled EDR Contact: 01/25/2010
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/30/2009	Source: EPA
Date Data Arrived at EDR: 08/11/2009	Telephone: 703-412-9810
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 11/23/2009
Number of Days to Update: 41	Next Scheduled EDR Contact: 01/11/2010
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/12/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/01/2009

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

ORANGE COUNTY FAIR AND EVENT CENTER
88 FAIR DRIVE
COSTA MESA, CA 92626

TARGET PROPERTY COORDINATES

Latitude (North): 33.66640 - 33° 39' 59.0"
Longitude (West): 117.9011 - 117° 54' 4.0"
Universal Tranverse Mercator: Zone 11
UTM X (Meters): 416458.3
UTM Y (Meters): 3725339.0
Elevation: 64 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 33117-F8 NEWPORT BEACH (DIGITAL), CA
Most Recent Revision: Not reported

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ORANGE, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
---	--

Flood Plain Panel at Target Property: 06059C0047E

Additional Panels in search area: 06059C0046E

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> COSTA MESA	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
A1	1/4 - 1/2 Mile WSW	Not Reported
A2	1/4 - 1/2 Mile WSW	Not Reported
4	1/2 - 1 Mile South	N
7	1/2 - 1 Mile North	Not Reported
C8	1/2 - 1 Mile North	NNW
C9	1/2 - 1 Mile North	NNW
10	1/2 - 1 Mile NNW	SSW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CROPLEY

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	29 inches	clay	Not reported	Not reported	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6
2	29 inches	59 inches	clay	Not reported	Not reported	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
2	11 inches	18 inches	sandy clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
3	18 inches	27 inches	sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
4	27 inches	70 inches	sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
5	70 inches	79 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

Limited Permission To Make Copies

Geotechnical Conslt. Inc. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2002. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.
