

**HARTS MILL FIRE STATION, SSL 896  
9476 Oroville Quincy Highway, Berry Creek, CA (Butte County)**

**QUESTIONS:**

1. Do you have any other information about the status of the well and drinking water supply?

The Department of General Services (DGS) contacted the Feather River Recreation and Parks District (FRRPD) in Butte County to request the results of a certified well test it reportedly conducted on the water well at the old Harts Mill Fire Station at 9476 Oroville-Quincy Highway, Berry Creek, CA 95916, Butte County, in 2009 or 2010. CAL FIRE advised the DGS the well test results came back clean (no contamination). The DGS does not have copies of the test results in its possession at this time and cannot guarantee the county will provide this information to the DGS timely or at all. However, the DGS will post any information we are able to obtain from any trustworthy source with regard to the condition of the well on DGS' Internet website at <http://www.surplusproperty.dgs.ca.gov/detail.aspx?id=896>.

The successful bidder will have an opportunity to conduct well testing as part of the due diligence process described in Section 6 of the Purchase and Sale Agreement prior to close of escrow.
